**Determination of Value:** The applicant for a permit shall provide an estimated permit value at the time of application. Permit valuations shall include **total value of work, including construction materials and labor**, for which the permit is being issued, such as electrical, gas, mechanical, plumbing equipment and permanent systems. If, in the opinion of the building official, the valuation is underestimated on the application, the permit shall be denied, unless the applicant can show detailed estimates to meet the approval of the building official.

In the event of a dispute, the Building Official shall use the latest version of the Building Valuation Data published in the International Code Council's *Building Safety Journal* or other similar cost per square-foot resources to determine the minimum acceptable valuation. Final building permit valuation shall be set by the building official.
