**Re: Traffic Letter for Revised Ridgegate Southwest Village Site Plan, a Supplement to
Ridgegate – Southwest Village Traffic Impact Study in Lone Tree, CO dated
October 22, 2020**

To Whom It May Concern:

This Traffic Compliance Letter has been prepared to provide a supplement to the approved *Ridgegate – Southwest Village Traffic Impact Study* (TIS) dated October 22, 2020 and prepared by JR Engineering. The scope of this letter will be limited to the effects of the site generated traffic from three recent site plans:

- The site at the southwest corner of RidgeGate Parkway and Avenue B (High Note Avenue)
- The site at the southeast corner of RidgeGate Parkway and Avenue D (Rhapsody Road)
- The site northeast of Havana Street and Avenue A (Lyric Street)

The locations of these three sites are shown in **Figure 1**. The amended preliminary site plan for Ridgegate Southwest Village dated **November 20, 2023** is included as an attachment to this letter.

Site Southwest of RidgeGate & Avenue B

The site at the southwest corner of Ridgegate Parkway and Avenue B (High Note Avenue) was originally studied as 85,000 SF of shopping center land use (ITE 820). The revised site plan is proposed as 21,000 SF of shopping center land use and 130 dwelling units of low-rise multi-family residential land use (ITE 220). The square footage of the shopping center is based on 15% floor area ratio (FAR), consistent with the original site plan. The number of dwelling units is a conservative estimate based on the density of other multi-family sites in Ridgegate Southwest Village. Trip generation reports are attached to this letter.

A comparison of trip generation values is shown in the table below:

Site Plan	Daily Trips	AM Peak Hour Trips	PM Peak Hour Trips
Original	5,383	194	482
Revised	3,022	223	246
Difference	-2,361	+29	-236

The revised site plan generates significantly fewer trips daily and in the PM peak hour. AM peak hour trips are slightly higher with the revised site plan. Therefore, JR did additional analysis on nearby intersections in the AM peak hour to ensure that the additional trips will not adversely affect traffic operations. The following intersections were analyzed:

- P2 – RidgeGate WB Couplet & Avenue B (High Note Avenue)
- P4 – RidgeGate EB Couplet & Avenue B (High Note Avenue)
- I6 – Avenue B (High Note Avenue) & Avenue Q (Octave Avenue)

JR routed the additional AM peak hour trips through the above intersections, and then added those trips to the volumes in the approved TIS. The new traffic volumes are shown in **Figure 2**.

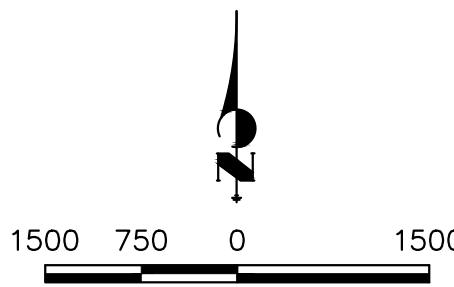

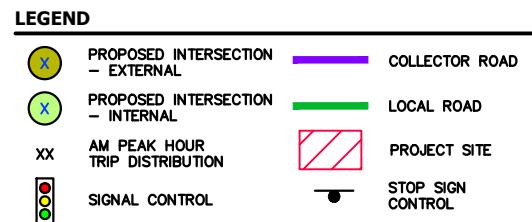

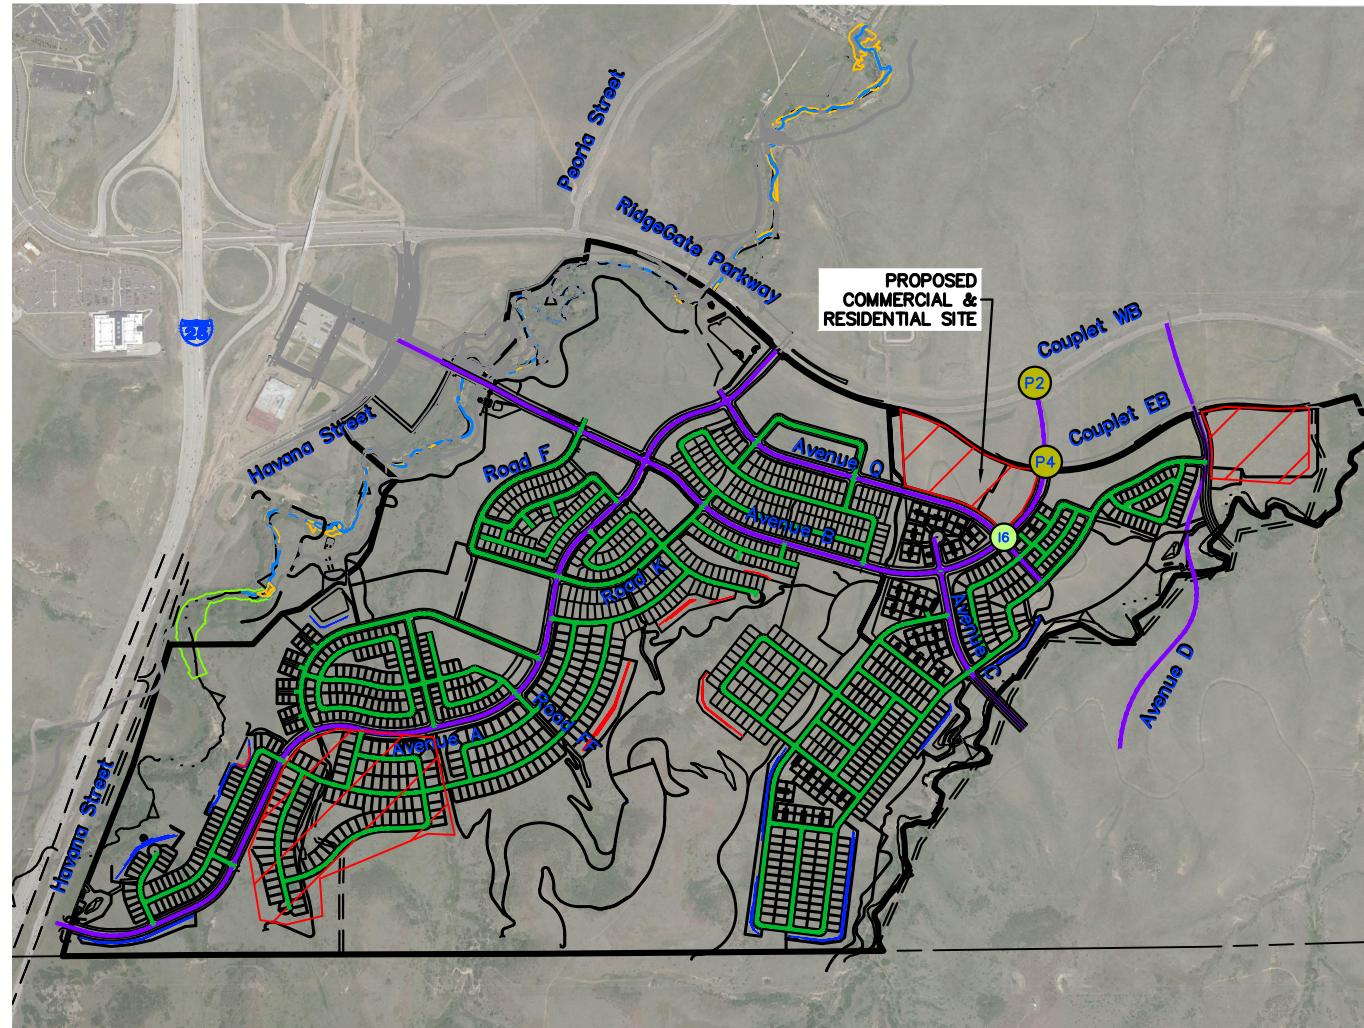

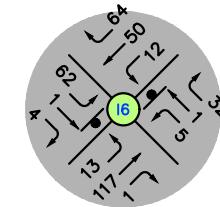

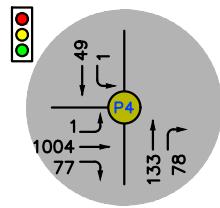

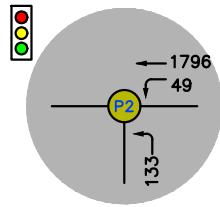

FIGURE 2 – YEAR 2026
TOTAL TRAFFIC
RIDGEGATE SOUTHWEST VILLAGE
PAGE 4
PROJ. NO. 15950.00

Centennial 303-740-9393 • Colorado Springs 719-533-2593
Fort Collins 970-491-9988 • www.jrengineering.com

The table below shows levels of service (LOS) for the selected intersections in the Year 2026, comparing results from the approved TIS with results from the revised site plan:

Intersection	Movement	AM Peak Hour LOS	
		Approved TIS	Revised Site
P2 – RidgeGate WB Couplet & High Note Avenue	WB Left	A	A
	WB Through	A	A
	NB Left	A	A
P4 – RidgeGate EB Couplet & High Note Avenue	EB Left	A	A
	EB Through	A	A
	EB Right	A	A
	NB Through	D	D
	NB Right	C	C
	SB Left	C	C
	SB Through	D	D
I6 – High Note Avenue & Octave Avenue	EB Approach	B	B
	WB Approach	A	A
	NB Approach	A	A
	SB Approach	A	A

The revised site plan has little effect on the levels of service at Intersections P2, P4, and I6. All movements are considered acceptable because they do not exceed the established threshold of LOS D.

Synchro HCM 6th Edition reports are included in the attachments.

Site Southeast of RidgeGate & Avenue D

This site was not included in the approved traffic impact study. Therefore, additional analysis was done to ensure the trips generated by the site will not adversely affect traffic operations.

The site is proposed as 10 acres of commercial land use. It was studied as 66,000 SF of shopping center space (ITE 820). This represents 15% FAR, which is consistent with the other commercial site in Ridgegate Southwest Village. Trip generation reports are attached to this letter.

The trip generation of the site is summarized in the table below:

Land Use	Daily Trips	AM Peak Hour Trips	PM Peak Hour Trips
66,000 SF Shopping Center (ITE 820)	4,532	185	400

JR routed site generated trips through the intersections that are expected to be most impacted by the additional traffic. JR then analyzed the intersections for level of service in the Year 2026. The following intersections were analyzed:

- P3 – RidgeGate WB Couplet & Avenue D (Rhapsody Road)
- P5 – RidgeGate EB Couplet & Avenue D (Rhapsody Road)
- I24 – Avenue D (Rhapsody Road) & Site Access

JR routed the site generated trips through the above intersections, and then added those trips to the volumes in the approved TIS. The new traffic volumes are shown in **Figure 3**. It should be noted that the site has a right-in, right-out access along Ridgegate Parkway. 50% of trips entering from the west and exiting to the east were routed through this RIRO access.

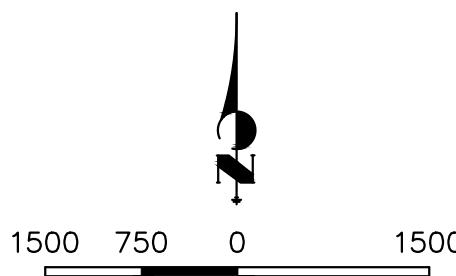

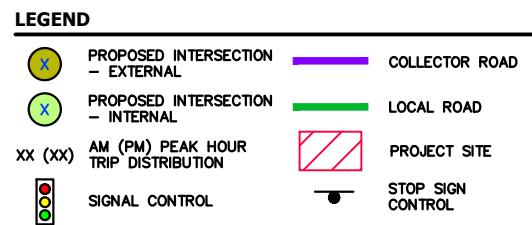

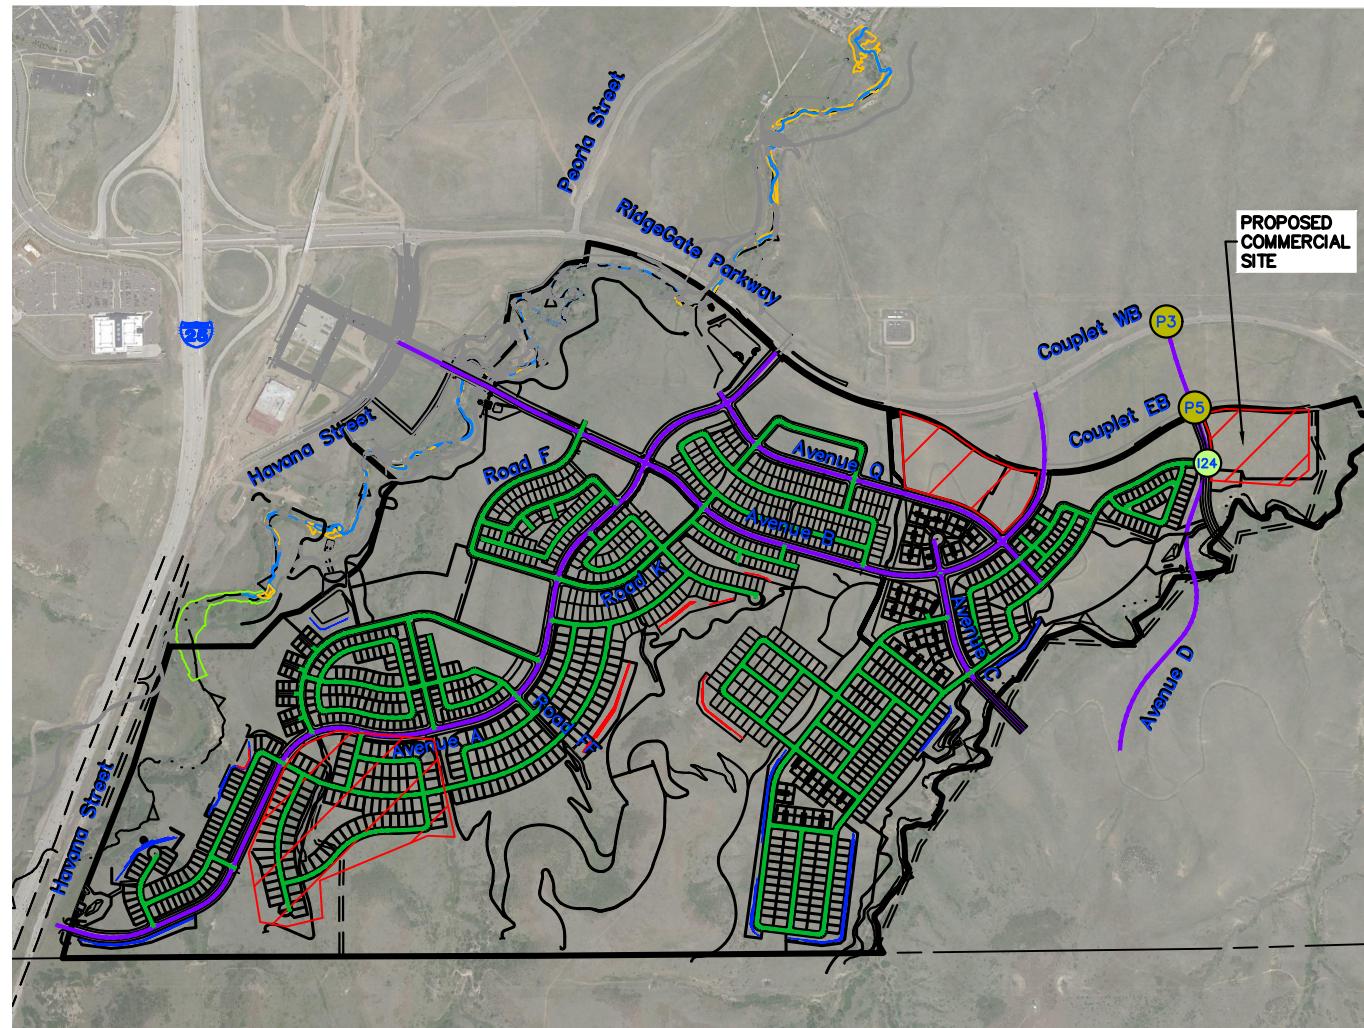

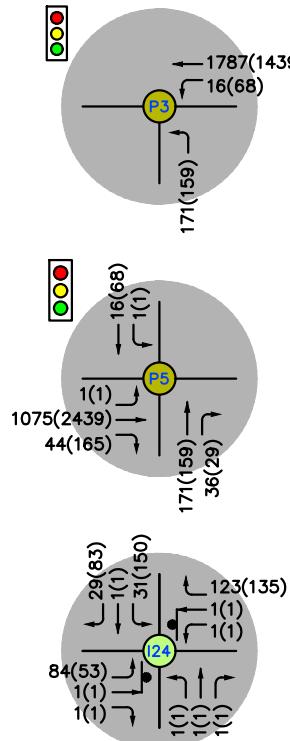

FIGURE 3 – YEAR 2026
TOTAL TRAFFIC
RIDGEGATE SOUTHWEST VILLAGE
PAGE 7
PROJ. NO. 15950.00

J·R ENGINEERING
A Westrian Company

Centennial 303-740-9393 • Colorado Springs 719-533-2593
Fort Collins 970-491-9988 • www.jrengineering.com

The table below shows levels of service for the selected intersections in the Year 2026, comparing results from the approved TIS with results from the analysis with the shopping center site:

Intersection	Movement	AM Peak Hour LOS		PM Peak Hour LOS	
		Approved TIS	Approved TIS + Shopping Center	Approved TIS	Approved TIS + Shopping Center
P3 – RidgeGate WB Couplet & Rhapsody Road	WB Left	A	A	A	A
	WB Through	A	A	A	A
	NB Left	A	A	A	A
P5 – RidgeGate EB Couplet & Rhapsody Road	EB Left	A	A	A	A
	EB Through	A	A	A	C
	EB Right	A	A	A	A
	NB Through	D	D	D	D
	NB Right	C	C	D	D
	SB Left	D	D	C	C
	SB Through	D	D	C	C
I24 – Rhapsody Road & Site Access	EB Approach	B	B	B	C
	WB Approach	N/A	A	N/A	A
	NB Approach	A	A	A	A
	SB Approach	A	A	A	A

The addition of the shopping center site has little effect on the levels of service at Intersections P3 and I24. The eastbound through movement at Intersection P5 worsens to LOS C in the PM peak hour. However, this is considered acceptable because it does not exceed the established threshold of LOS D.

Synchro HCM 6th Edition reports are included in the attachments.

Site Northeast of Havana Street and Avenue A

The site at the northeast corner of Havana Street and Avenue A was originally studied as 303 single family detached dwelling units land use (ITE 210). The revised plan is proposed as 309 single family detached dwelling units land use (ITE 210). Trip generation reports are attached to this letter.

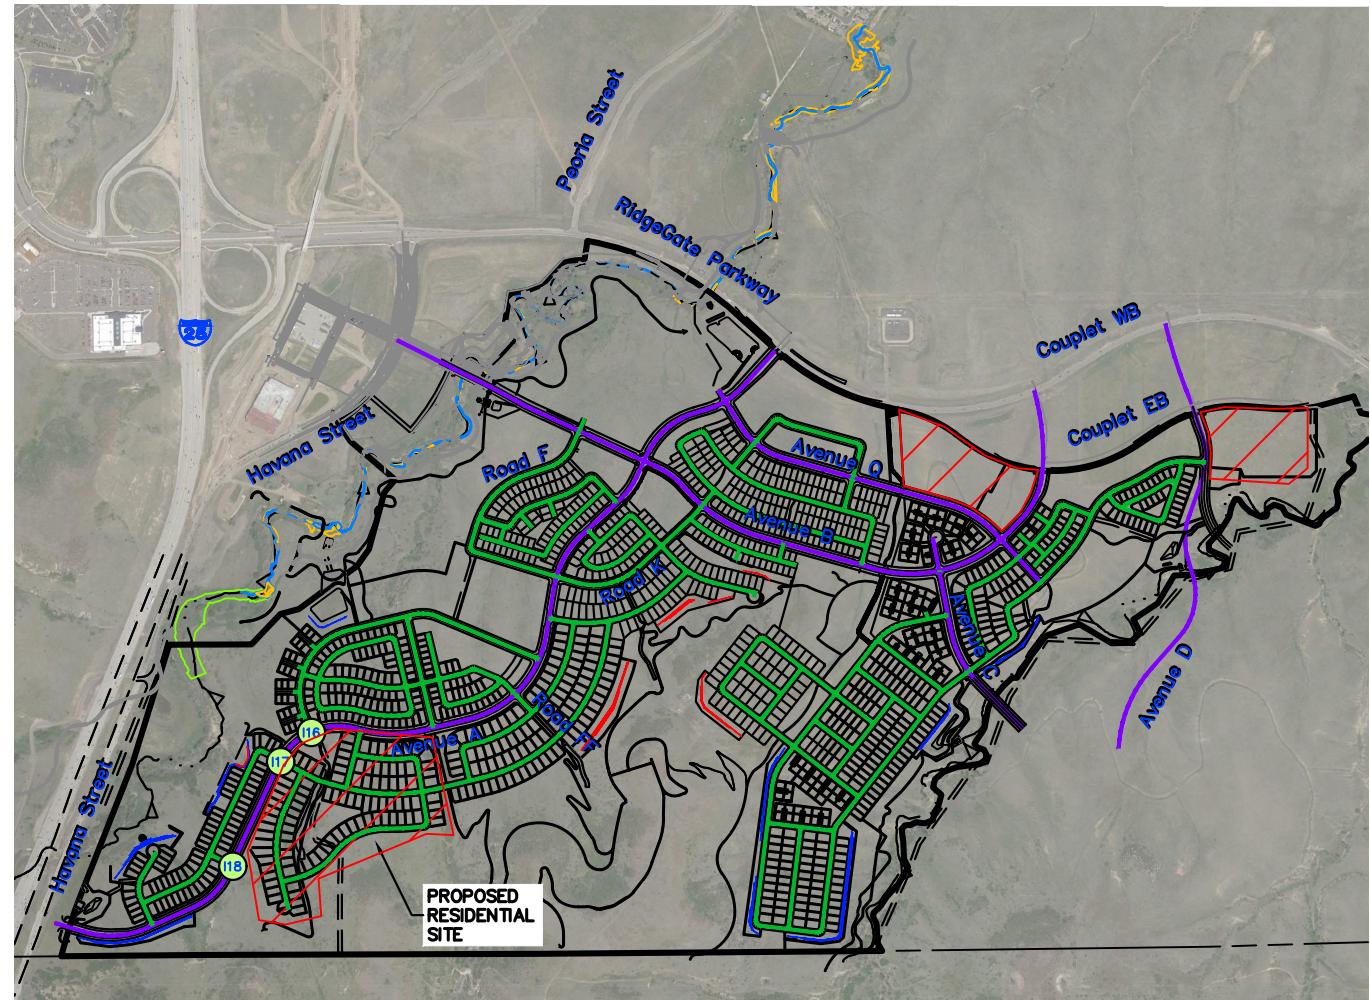

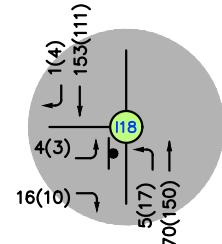

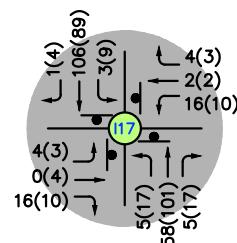

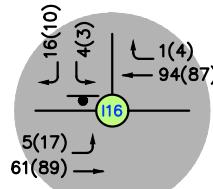

A comparison of trip generation values is shown in the table below:

Site Plan	Daily Trips	AM Peak Hour Trips	PM Peak Hour Trips
Original	2,883	220	294
Revised	2,936	224	300
Difference	+53	+4	+6

The revised site plan generates additional daily trips, AM Peak Hour trips, and PM Peak Hour trips. However, the increase to Peak Hour trips is not expected to adversely affect traffic operations within Zone 1. Because the revised site plan generates a 2% increase in trips, JR rerouted site generated trips through the following intersections:

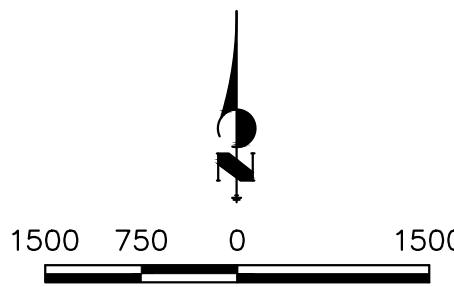

- I16 – Avenue A (High Note Avenue) & Copperton Road
- I17 – Avenue A (High Note Avenue) & Tenor Trail
- I18 – Avenue A (High Note Avenue) & Adage Road

Both the 2% increase in site generated trips and rerouting yielded minimal increases to trips going through these intersections. As such, JR did not perform analysis on these intersections due to the negligible impact of these changes. The site layout and rerouted traffic volumes are shown in **Figure 4**.

Conclusion

JR concludes that the approved traffic impact study and roadway improvements are not adversely impacted by the revised site plans.

If you have any questions or comments, feel free to contact me at efarney@jreengineering.com or 303-267-6183.
